

I am a man living with AIDS, COPD and chronic Epstein Barr. The uplifting encouraging inspirational music and talk I get from my local K-LOVE station (106.7 FM) make my life much easier to bear and I find I need much less in the way of anti-depressants. When my neiceses, nephews, and spouses grandchildren are hear I do not have to worry about them hearing music and language unfit for them. Many children and teenagers in my listening area would be without any form of moral, encouraging and non-judgemental leadership. This station helps in this community's fight against drug use, underage drinking and gang related activities.
